

Code:

```
1 class Testing
2 {
3     public static void main(String args[])
4     {
5         System.out.println("Hi There, How are you?");
6     }
7 }
8 }
```

Ouput:

The screenshot shows a Java Swing window titled "Pharmacy Inventory Management System". The window has a teal header bar. Below the header, there is a form area with several input fields and buttons. The form is organized into two columns. The left column contains fields for "Drug Code", "Drug Name", "Price", and "Qty" (a spinner box set to 0). The right column contains fields for "Total Cost" (displaying 210), "Payment", and "Balance". An "ADD" button is positioned between the "Qty" and "Payment" fields. Below the form area, there is a table with four columns: "Drug Name", "Price", "Qty", and "Total". The table contains three rows of data: Omeprazole (Price: 15, Qty: 2, Total: 30), Aspirin (Price: 40, Qty: 3, Total: 120), and Losartin (Price: 30, Qty: 2, Total: 60). To the right of the table, there is a "Print Invoice" button.

Drug Name	Price	Qty	Total
Omeprazole	15	2	30
Aspirin	40	3	120
Losartin	30	2	60
